Background: Santanna Natural Gas Corporation d/b/a Santanna Energy Services and AAA Energy by Santanna ("Santanna" or "we" or "our") is licensed by the Pennsylvania Public Utility Commission ("PUC") to offer and supply electric generation services in Pennsylvania. Santanna's Pennsylvania license number is **A-2013-2370875**.

Definitions: "Electric Generation Supplier" ("EGS") means an entity that sells electric energy to retail customers in Pennsylvania. **"Electric Distribution Company" ("EDC")** means the public utility that provides facilities for the transmission and distribution of electricity to retail customers. **"Generation Service"** means the production of electricity. **"Generation Charges"** are part of the basic service charges on every customer's bill for producing electricity. Generation service is competitively priced and is not regulated by the PUC. This charge depends on the contract between the customer and the supplier. **"Transmission Charges"** are part of the basic service charges one very customer's bill for transporting electricity from the source of supply to the EDC. The Federal Energy Regulatory Commission ("FERC") regulates retail transmission prices and services. This charge will vary with your source of supply. A glossary of industry terms is available at www.PaPowerSwitch.com. "**Renewable resource"** The term includes technologies such as solar photovoltaic energy, solar thermal energy, wind power, low-head hydropower, geothermal energy, landfill or other biomass-based methane gas, mine-based methane gas, energy from waste and sustainable biomass energy. **Renewable Energy Certificates ("RECs")** RECs represents proof that electricity was generated from an eligible renewable energy resource such as wind, solar, hydro, or qualified biomass.

Terms of Service: These terms and conditions together with the Contract Summary, and if applicable, your signed written enrollment form, electronic online enrollment record or recorded telephonic voice recording confirming enrollment consist of the agreement for electric service between you and Santanna ("Agreement"). You acknowledge and accept the following terms and conditions as part of your Agreement with Santanna. As an EGS provider, Santanna will supply electric generation services as required by your EDC. Your EDC shall be responsible for transmitting, distributing, and delivering the electricity to you and will continue to respond to all service calls and emergencies. Switching to an EGS will not impact your electric service reliability. Generation prices and charges are set by the electric supplier you have chosen. The Public Utility Commission regulates distribution prices and services. The FERC regulates transmission prices and services.

If you are enrolling in one of Santanna's clean, green, renewable, or environmental plans that may be marketed under various brand names, such as "Earth Friendly" or "Renewable Energy", Santanna will either purchase electricity sourced from renewable resources or RECs from renewable generation facilities located in the United States sufficient to match the amount of electricity needed to serve you for the length of your contract. Electricity is the product of a mix of generation energy sources, that is delivered over a system of wires. So, it is not yet possible to deliver electricity from a specific generation facility directly to your home or business. However, purchasing this product enables you to directly support the continued use and development of renewable electricity, sustainable fuel sources, reducing carbon emissions and/or providing other local and global environmental benefits in the region where the renewable electricity generator is located. Santanna may take several months after the end of a calendar year to purchase and/or retire the RECs needed to fulfill your product.
